

***contigo***®

**Contigo is an American brand  
of travel and coffee mugs,  
water bottles and kids bottles.**

- + INNOVATIVE
- + SMART AND STYLISH DESIGN
- + ECO FRIENDLY
- + BPA FREE
- + SPILL AND LEAK PROOF
- + EASY TO CLEAN

Let's be honest: there are already so many challenges in our lives, drinkware shouldn't be one of them. Spills on your papers due to fallen bottles, a stain on your clothes because of a clumsy nozzle, being unable to open your bottle with one hand while you're multitasking or even -imagine the horror- cold coffee. At Contigo, we've had enough of it! That's why a team of our researchers is tackling this challenge since 2004. We present you an extensive range of drinkware that answers all of the above problems. How?

Contigo is the global market leader in branded drinkware on the go. Our strategy is to focus on innovation in order to raise your comfort. Our patented technology was developed to offer you a durable solution for everyday struggles. Words like AUTOSEAL® or AUTOSPOUT® probably won't mean that much to you, but spill- and leakproof and one-handed drinking may sound like a dream come true. Vacuum insulated doesn't sound that hot, but it will keep your coffee warm for at least four hours. By means of these technologies, Contigo revolutionizes the world of drinkware. But we don't stop there. We're continuously looking for ways to improve our products and to keep offering you the very best on the market. And our products are not only functional, but easy on the eyes as well. A product to be proud of.

Our patented AUTOSEAL® technology was our first innovation. Its 100% Spill & leak proof design eliminates the possibility of spilling whether you are in the car, at the office or at home. With one hand, simply press the button to drink, release to seal and it automatically seals between sips. AUTOSEAL® technology is available on our Travel mugs, water bottles and kids bottles.

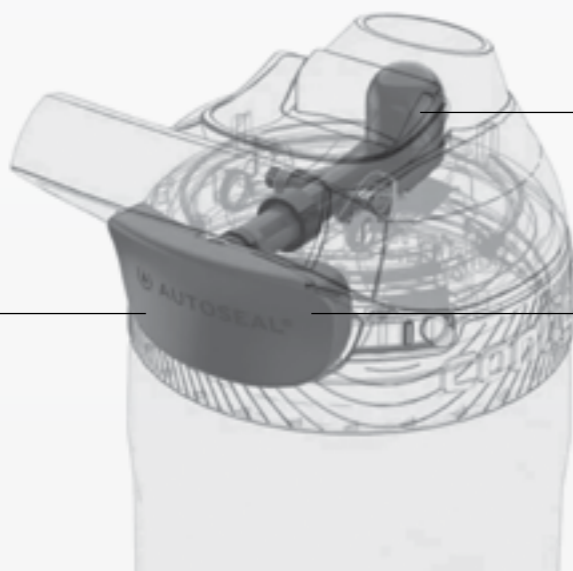

Automatically sealing

Easy to clean lid

HOW IT WORKS

Press the AUTOSEAL® button to sip, release the button to automatically seal.

100% spill & leak proof

One-handed operation to open, drink and close

Example as used in Cortland

Staying hydrated is as simple as a touch of a button with our patented AUTOSPOUT® technology. Whether you are at the gym, in school, or on the road, AUTOSPOUT® water bottles feature a pop-up spout for easy one-handed drinking so you can keep your eyes on the task at hand. AUTOSPOUT® technology is available on a variety of water or kids bottles.

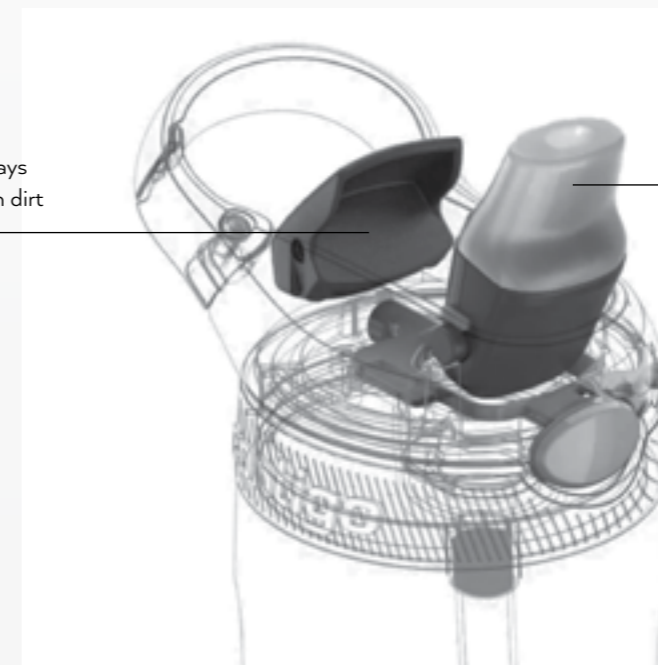

Leak proof in closed position

One-handed operation to open, drink and close

HOW IT WORKS

Just press the AUTOSPOUT® button and the spout will automatically flip-up

Spout is always covered from dirt

Convenient drinking without having to bite on the spout/valve

Example as used in Ashland

SNAPSEAL™ technology works in a unique way. Pushing the button upwards will allow drinking, pushing it downwards will close the mug. This has the advantage that only one hand is needed to open and close the drinking mug. The technology guarantees a leak proof drinking experience and keeps drinks at the correct temperature. Drinking mugs equipped with SNAPSEAL™ have a seal with soft grip, a leak proof lid and a special reservoir to sip hot drinks from. The drinking mug can be easily cleaned by pushing the handle upwards.

Hot/cold does not escape from the drink hole

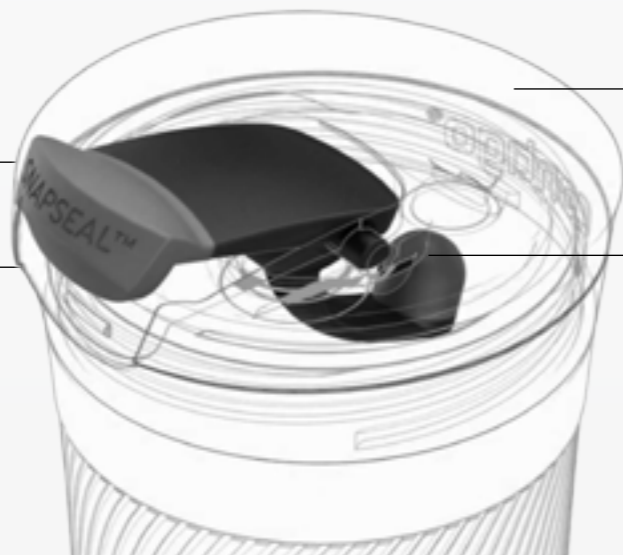

One-piece leakproof lid

One-handed operation to open, drink and close

### HOW IT WORKS

SNAPSEAL™ technology works in a unique way. Pushing the button upwards will allow drinking, pushing it downwards will close the mug.

Soft closure grip

Easy to clean lid

Leak proof drinking experience

Make it! Shake it! Take it! This is probably what describes AUTOCLOSE™ technology best. The AUTOCLOSE™ technology has been designed especially so consumers can mix their drink first. As soon as the drink is ready, the straw can be inserted into the mug and Bob's your uncle. When the straw is removed, the mugs are spill & leak proof. So the mugs are ideal for iced tea, iced coffee and powdered drinks. The durable and sturdy BPA-free Tritan™ material prevents stains and odors and can also be put in the dishwasher without problems.

100% leak proof shaking and mixing\* (when straw is removed)

Dishwasher safe

### HOW IT WORKS

Add the ingredients and shake. When drink is ready, add the straw & enjoy your drink!

Shatter resistant

## VACUUM TECHNOLOGY

Contigo double-wall stainless steel travel mugs and water bottles incorporate vacuum insulation, the most advanced technology available.

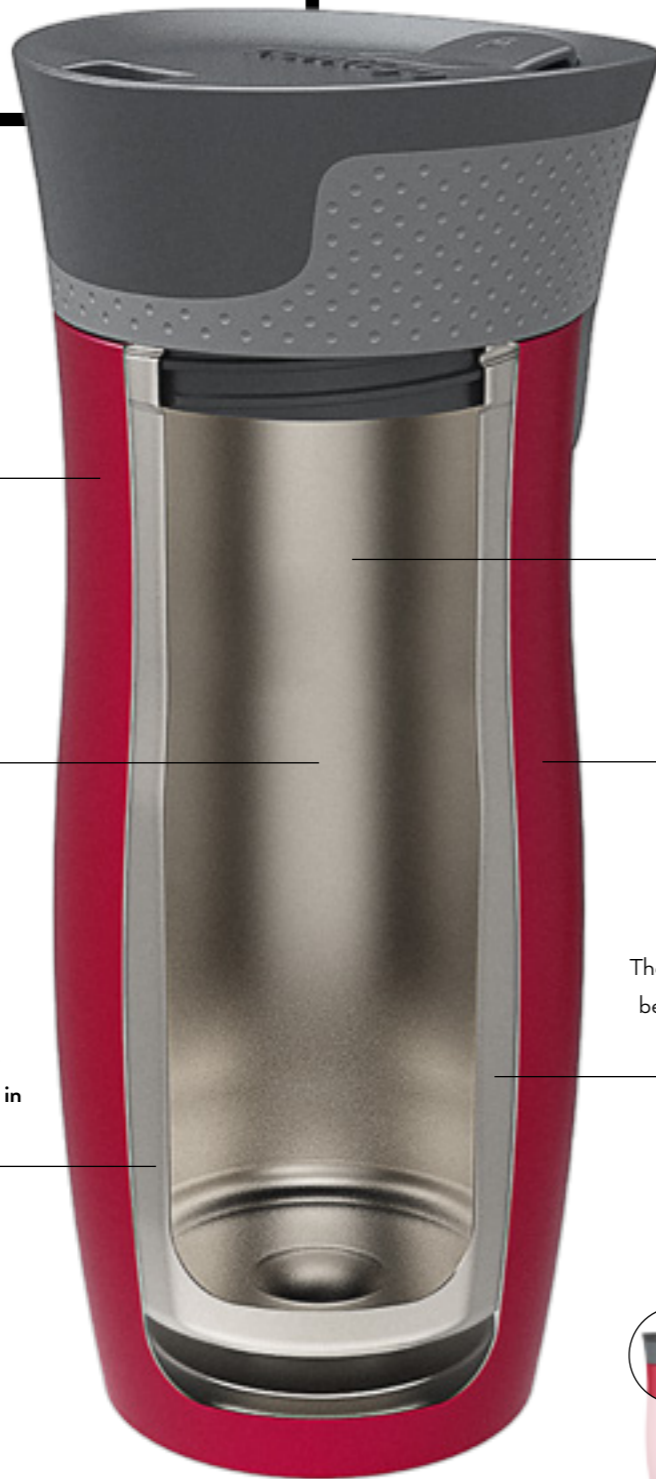

Better grip

Beverages stay hot for 4 up to 9 hours and cold up to 21 hours

### HOW IT WORKS

Made out of two separate stainless steel walls

Air between the two walls is removed, creating a vacuum in that space.

Retains beverage temperatures for hours, maximizing beverage enjoyment

Double wall prevents condensation on the outside of the mug. **Cold on the outside, hot on the inside.**

The exchange of energy/temperature between the inside and the outer air temperature is inhibited.

Example as used in West loop

## CLEANABILITY

Contigo technology is not only about the drinking experience, but also about cleaning. Hot drinks can leave tough stains nestling in nooks and crannies when they dry. But thanks to the clickable lid, whereby the lid pivots open, the entire inside can be easily reached to remove all leftovers quickly and easily. All new AUTOSEAL® mugs and bottles are provided with an easy clean lid. All Contigo products (except for colored thermal mugs) are dishwasher safe.

### HOW IT WORKS

Simply release the button mechanism and pop up the button for cleaning in the dishwasher

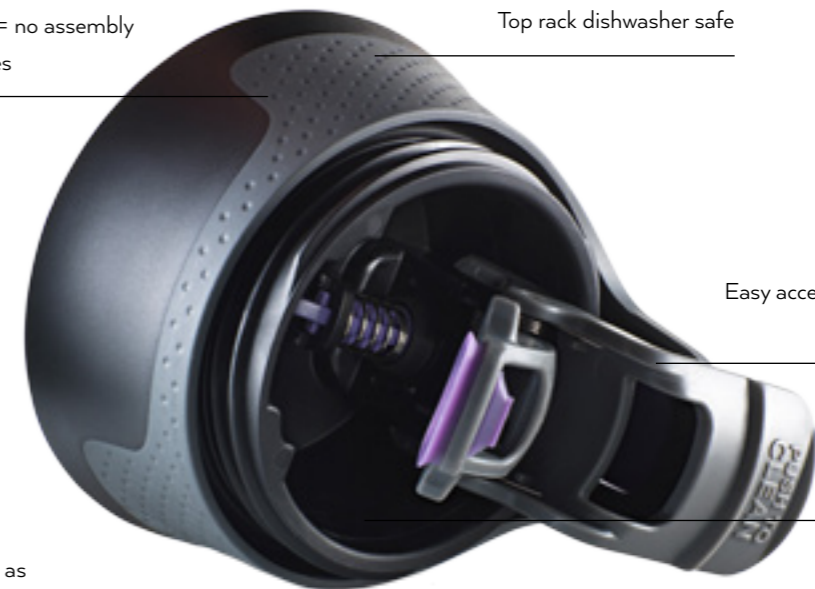

Flip open

Example as used in Cortland

No loose parts = no assembly risk or lost pieces

Top rack dishwasher safe

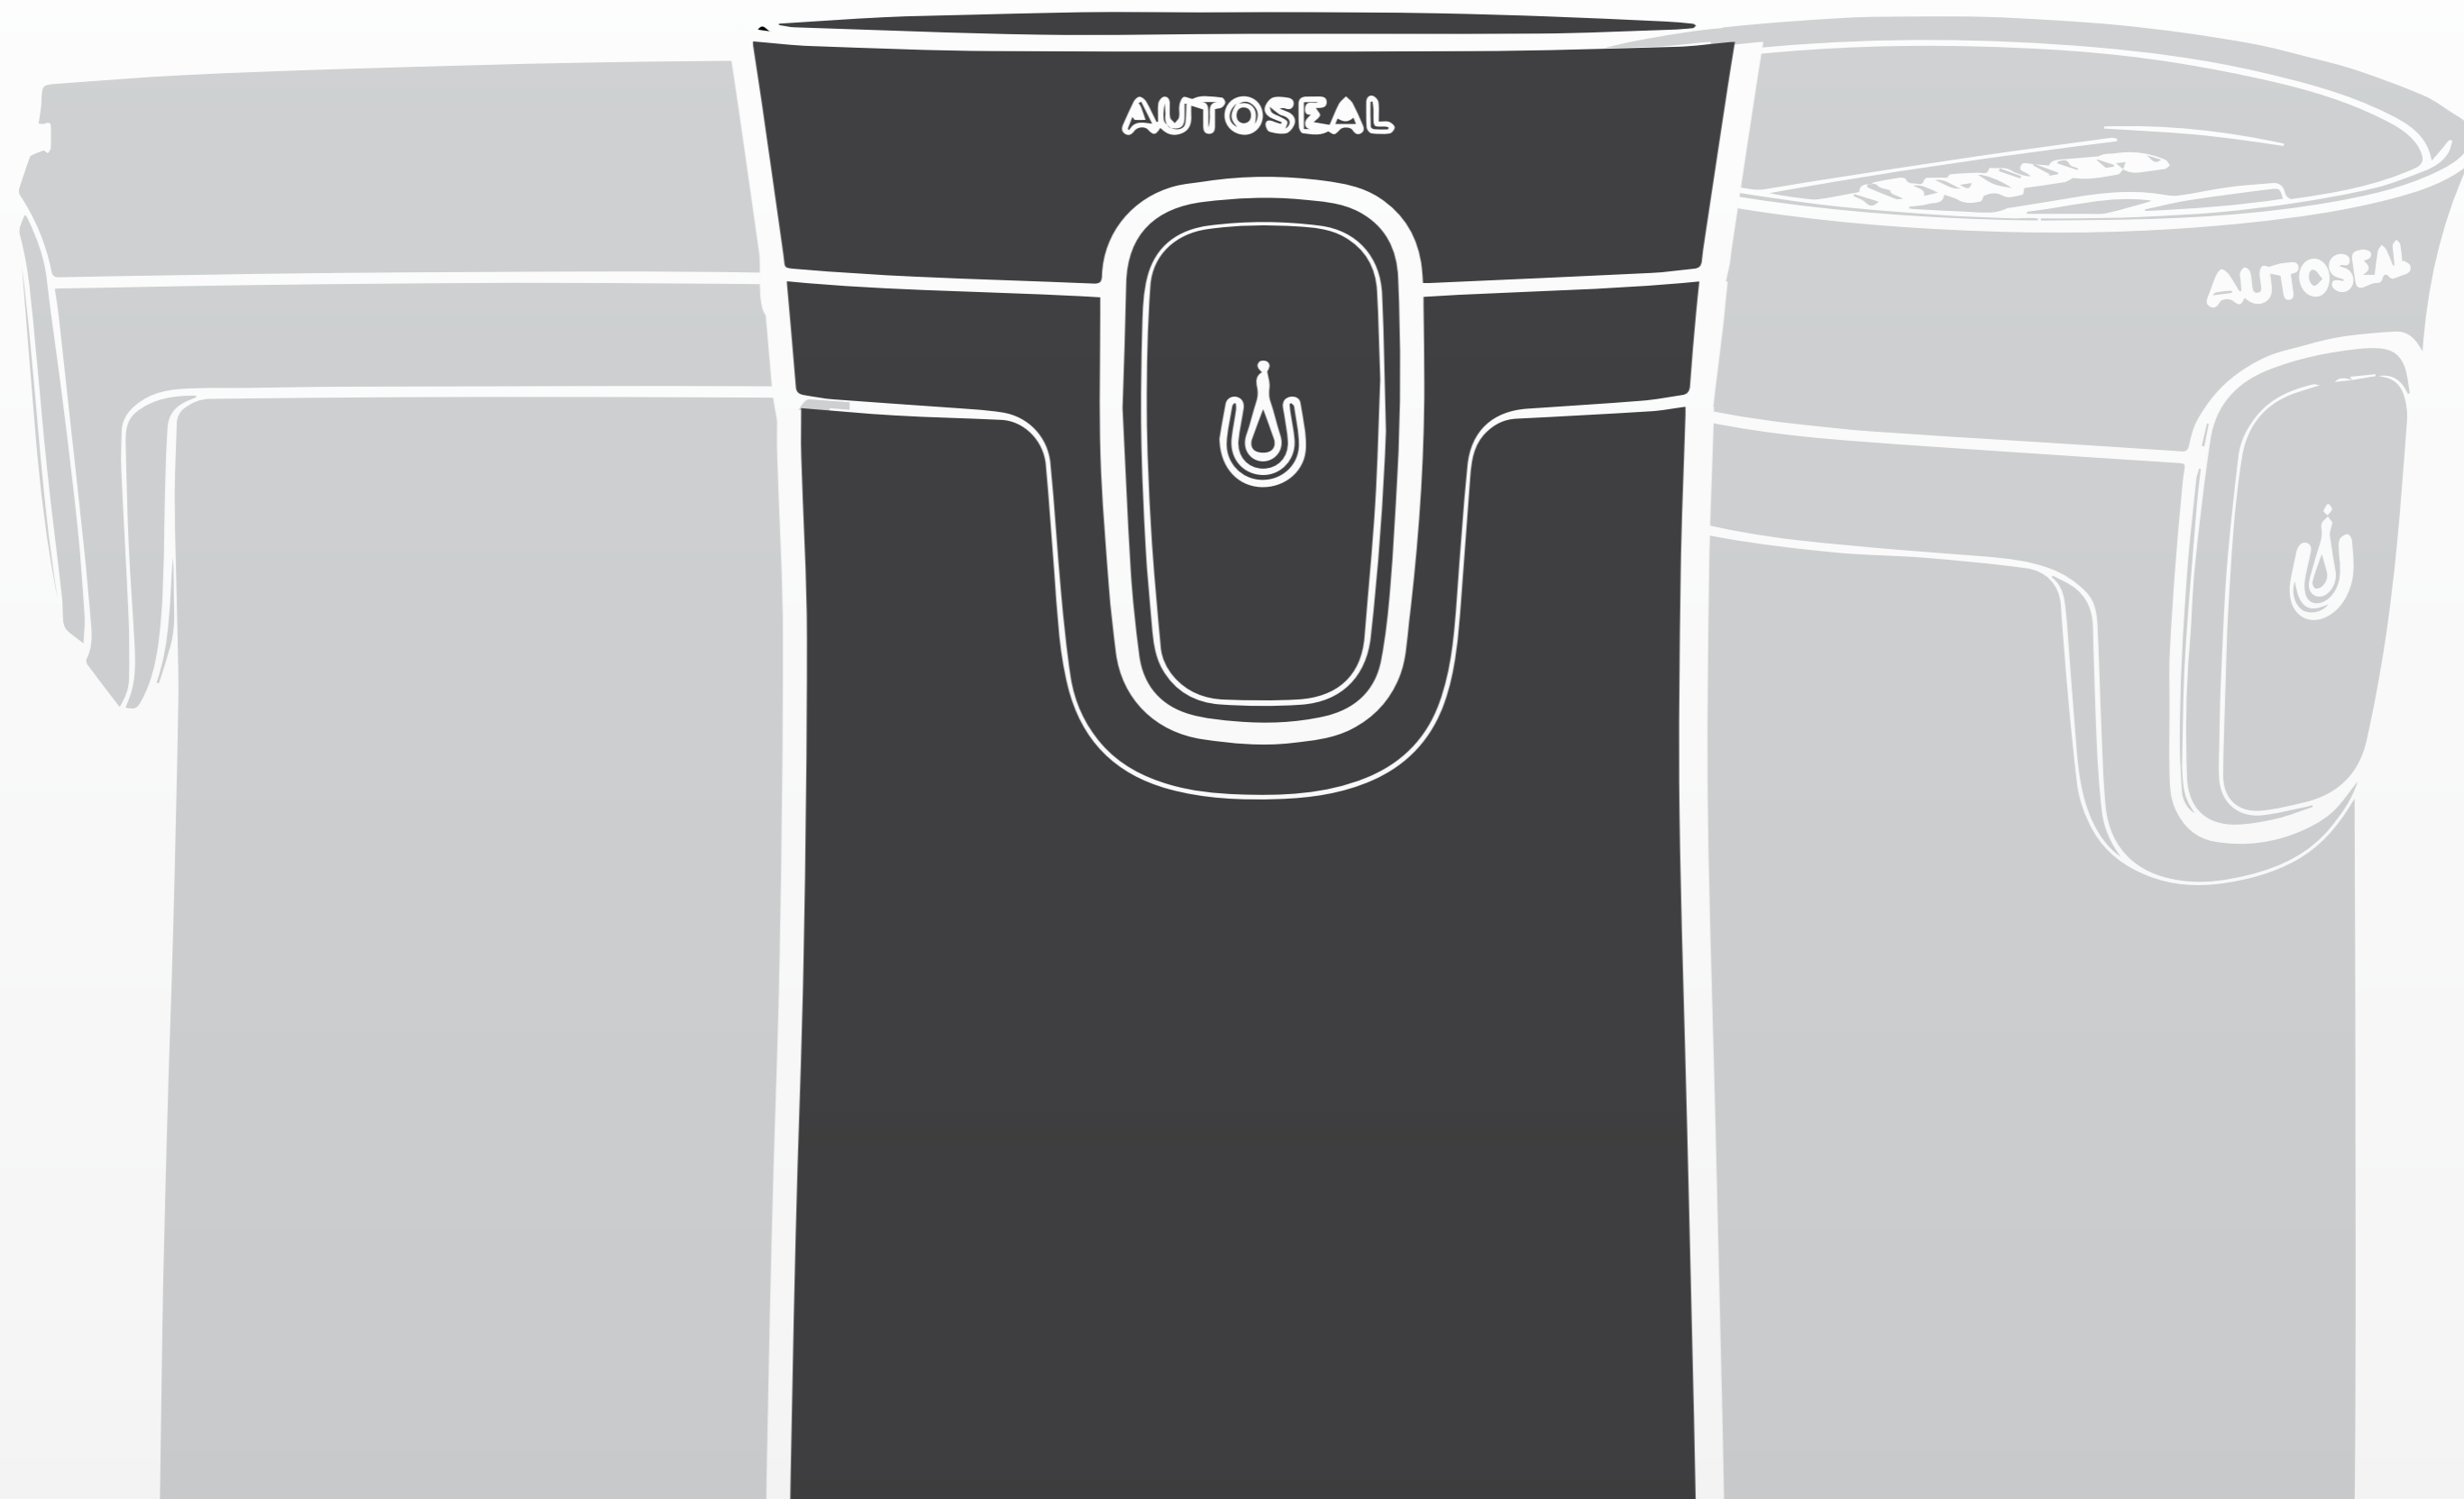

Easy access to lid components for easy cleaning

No hassle cleaning

Example as used in West loop

# THERMAL MUGS

Innovation never tasted  
so hot – or so cold

# WEST LOOP

★ **CONTIGO'S NR. 1 BEST SELLING MUG**

One-handed operation

Top-rack dishwasher safe lid

- High volume display: holds up to 120 -130 bottles
- Contigo branding integrated
- Accessible from both sides
- Ideal to stand freely in-store to increase awareness
- Size display: W 710 mm x D 485 mm x H 1605 mm
- Envelop: W 735 mm x D 510 mm x H 1615 mm
- 3 displays per pallet
- Weight : 24 kg

# KAMBUKKA

**Kambukka's primary goal exists in introducing innovative trendy consumer brands and consumer goods which offer an answer to daily challenges**

Kambukka is a sales & marketing organization focused on launching and distributing innovative trendy consumer brands in the EMEA region. In 2009 the company was established to market Contigo, a US based drinkware brand in Europe, the Middle-East and Africa. Kambukka quickly managed to get the brand introduced in 42 countries.

Kambukka's strength is a team of sales, marketing & logistics professionals with a lot of experience in consumer goods. We have access to a large network of sporting goods-, outdoor- and houseware shops and toy & kids related retailers, both off- and online. We work with large mass retailers and small specialty shops. To reach these smaller independent shops we contracted more than 35 agents and 30 sub-distributors in 42 countries. We currently have access to over 25.000 (retail sales points) and this amount is still growing.

Our office is located in Hasselt, right in the heart of the Belgium province called Limburg. Thanks to our close proximity to neighbouring countries like Germany and The Netherlands, we are able to set up proficient cross-border cooperations.

We hold the exclusive rights to distribute and market the drinkware brands Contigo, Bubba, Bueno by Contigo and Avex in EMEA, all brands owned by Newell Brand and Packit, a brand of freezable cooler bags.

Kambukka is not your typical distributor. We take pride in rolling out new, innovative & trendy brands from A-Z. Our areas of expertise include product marketing, point of sales creation, website and webshop, logistics, social media, service after sales etc...
